Ryan O. Tunstall
FRONTEND WEB DEVELOPER and DESIGNER
Sims Media Design, LLC.

SUMMARY

As a mid-level frontend web developer, I have a strong foundation in HTML, CSS, and JavaScript, as well as experience with modern frontend frameworks such as React and Angular. I have the ability to translate design mockups into functional, accessible and responsive websites, and have a strong understanding of cross-browser compatibility issues. In my previous roles, I have successfully implemented responsive design principles and worked on projects with complex user interfaces. I am comfortable working with back-end developers to integrate front-end code with server-side functionality.

In addition to my technical skills, I am a strong communicator and work well in team environments. I am skilled at managing my time and prioritizing tasks to meet project deadlines. I am constantly seeking to learn and improve my skills, and enjoy staying up-to-date with the latest trends and best practices in web development.
